# PAINÉIS VARIADOS

Para uma porta única

A escolha dos painéis é o passo final para personalizar a sua porta

# INFORMAÇÃO GERAL

## EXPOSIÇÃO

### INTERIOR

Painéis indicados para ambientes interiores.

Exemplo: apartamentos.

### EXTERIOR RESGUARDADO

Painéis indicados para ambientes externos protegidos dos agentes atmosféricos.

Exemplo: sob coberturas a distanciar a porta em pelo menos 1,5 metros da linha do efeito direto de raios solares e chuva.

### EXTERIOR

Painéis indicados para total exposição.

Exemplo: zona costeira ou com elevada amplitude térmica.

O catálogo pretende representar alguns dos modelos e acabamentos mais procurados no mercado.  
Não representa a totalidade disponível.

## COMPONENTES DOS PAINÉIS

### GOTEIRAS

A ser colocado na base do painel, no lado exterior da porta. Recomendado em portas com exposição ao ambiente exterior.

Disponível em madeira maciça ou em alumínio, com acabamentos em conformidade com os painéis.

### BITES

Réguas a rematar o perfil do painel colocado no lado interior da porta. A sua colocação é a opção apresentada de série para a fixação do painel, na maior parte dos modelos das portas Dierre.

Disponível com várias variantes: em madeira (perfil de série ou rasantes), simbiose do plástico com madeira ou alumínio. Extensa variedade de acabamentos em qualquer das opções mencionadas.

### RIPA CENTRAL

Perfil para colocação entre os dois painéis do lado interior da porta de duplo batente, só escusado em alguns modelos de portas Dierre.

Disponível em madeira e alumínio e em conformidade com os painéis escolhidos para a porta.
